FACE MAPPING

You can take a digital photograph of your face and apply it to your Create-A-Skater! By following a few simple steps, you'll be in the game!

GET YOUR FACE IN THE GAME

Follow these steps to get your face in the game:

1. Take a digital photograph of yourself. Make sure it's taken straight from the front and has even, flat lighting (no shadows!).
2. Save your picture as a 128 x 128 image file (.bmp, .jpg, .gif, .png).
3. Select **Custom Faces** from the Launcher and you'll be taken to the Custom Faces menu. Browse your computer's hard disk and select your digital photo.
4. Now that you have imported your face into the game, proceed to the Create-A-Skater section in the game to edit the mapping of your face, as well as facial tone, colour or skin (instructions in next section).

EDIT YOUR FACE

Follow these steps to edit your imported face:

1. Select Edit Points from the menu. Edit the points at which your face is mapped onto the Create-A-Skater by following the on-screen instructions. You can continue to edit the points of your face mapping until you're satisfied.
2. Further match the colour of your face to the surrounding skin by selecting **Colour Your Face** from the menu. There are three bars that represent Hue, Saturation and Value of the colour of your face. Don't worry if our presets aren't what you want—at this stage you just want to get your face blending seamlessly with the preset surrounding face texture. You can tweak the colour of your skin in the next step.
3. Adjust or recolour your skin colour by selecting Colour Your Skin from the menu. Again, there are three bars that represent Hue, Saturation and Value of the colour of your skin.
4. You are now done editing your Custom Face.
